

POm I 25

- For protection of mains and appliances in industrial buildings, administration buildings, buildings of civil amenities and detached houses against the effects of overvoltage wave caused by a close, direct or indirect lightning hit
- It decreases overvoltage and restricts overvoltage wave energy
- Installation: into the main distributor
- Usage as the 1st level T1 of overvoltage protection
- It provides overvoltage protection for appliances installed in the main distributor in the range of T1, T2, T3 (coarse, medium and fine protection)
- High diverting capability provided by powerful varistors MOV and lightning arrester
- Optical and remote signalization of operation state
- Multifunctional terminals for conductors
- Possibility of monoblock connection by bus bars
